

Department of Water  
Government of Western Australia

# North East Corridor Case Study

## Experiences and Lessons

# Introduction

- The Area and Objectives
- What We're Doing
- The Challenges Ahead

# The Area and Objectives

- To coordinate a District Level Plan
- To facilitate early stage release of land where possible

# What Are We Doing?

- Reviewed LWMPs and provided feedback
- Process with DoW

# What We're Doing – The Process

- Review LWMPs whilst preparing DWMP
  - Initial focus on quantity management
  - Establish land requirements
  - Shift focus to water quality and water conservation

# The Challenges Ahead

- Enough certainty on water quantity before modelling completed
- Providing CoS with a level of comfort
- Resolving a consistent and acceptable approach to water quality management
